1 Why we need this policy

This document sets out the policy for non-medical prescribing (NMP) for the Trust, informing health care professionals and patients of the process of non-medical prescribing.

1.1 Purpose

Following this policy will help the Trust to:-

- | |
|---|
| <ul style="list-style-type: none">• Ensure NMP takes place within a clinical governance framework |
| <ul style="list-style-type: none">• Ensure NMPs are aware of their legal and professional responsibilities and boundaries |

The NMP must follow the policies and procedures, failure to do so may result in the Trust withdrawing its indemnity.

1.2 Objectives

The objectives of this policy are to:

- | |
|--|
| <ul style="list-style-type: none">• Improve the patient experience |
| <ul style="list-style-type: none">• Improve use of time for the patients', nurses and medical staff |
| <ul style="list-style-type: none">• Clarify professional responsibilities leading to improved communication between team members |
| <ul style="list-style-type: none">• Develop new ways of working and opportunities to modernise services and processes |

1.3 Scope

The policy and associated procedures provide guidance on both becoming a non-medical prescriber and on good practice for independent and supplementary prescribers their Designated Prescribing Practitioner (DPP) and Practice Assessor.

2 Who this policy applies to

- | |
|--|
| <ul style="list-style-type: none">• Non-medical prescribers (NMPs) employed within the Trust, who carry out the duties as either an independent or supplementary prescriber, or both, where the Trust supports their prescribing role. |
|--|

- | |
|---|
| <ul style="list-style-type: none"> • Prospective NMPs who have the support of the Trust to access appropriate training |
| <ul style="list-style-type: none"> • DPP/ Practice Assessor and Practice Supervisor involved in the supervision of NMPs both pre and post registration |
| <ul style="list-style-type: none"> • Managers with NMPs working within their area of responsibility |

2.1 Roles and responsibilities

| Role | Responsibility |
|---|--|
| Trust NMP Lead | Responsible for leading and developing NMPs practice and monitoring individuals' adherence to governance frameworks |
| Chief Pharmacist | Responsible for the co-ordination of supply of the prescription pads, monitoring of NMPs prescribing and subsequent costs and support of their practice through pharmacological and prescribing advice and education; authorising and supporting pharmacist NMPs and managing the Trust NMP lead |
| Professional Heads | Responsible for authorising and supporting NMPs within their profession areas of responsibility |
| NMP Line Managers | Responsible for ensuring this policy is implemented and monitored within their area of responsibility and remain responsible for the support and supervision of their staff practising as NMPs |
| Designated Prescribing Practitioner (DPP) /Practice Assessor | Responsible as the designated prescribing practitioner required throughout the NMPs training and the assessor required during the NMPs registration with both the professional body and the trust. The DPP must work in the same field of practice as the NMP. Within TEWV this role can only fall to a Medic or Level 3 Prescriber. |
| Practice Supervisor | Responsible for support and supervision in the practice learning environment and to provide feedback to the DPP. The Practice supervisor must be working in a prescribing role. |
| NMP | Responsible and accountable for all aspects of their prescribing decisions, and to their employers and regulatory bodies for their actions. They should only prescribe those medicines they know are safe and effective for the patient and condition being treated within their sphere of competence. All NMPs should have a working knowledge of this policy and ensure they always work within the parameters set down, and adhere to requirements. |

3 Governance framework

Patient safety and assurance must be paramount in any plan to implement NMPs practice. Non-medical prescribing should be an integrated part of organisational clinical governance arrangements and relevant action plans. The trust must consider the impact of non-medical prescribing on other related policies and procedures e.g. drug error reporting. The

Department of Health has set out key steps for NHS organisations to have in place to ensure the implementation of clinical governance. These include:

- Clear lines of responsibility and accountability for overall quality of clinical care
- Management of risk
- Clear procedures to identify and remedy poor performance

3.1 Service needs

In order to develop NMP in a consistent way at local and corporate level, it is essential that there is a strategic approach to the development of infrastructures including relevant training, clinical support and supervision, financial frameworks and partnership agreements.

Any development should be service led, directed by service developments and modernisation requirements, not individual professional development requests. Specific requirements related to each service should be agreed within the Quality & Assurance framework (see appendix 1).

4 Managing NMPs

The manager of services who employ NMPs must ensure that they:

- Ensure NMPs in their area of responsibility are supported to access a minimum of 14 hours per year protected time to attend the required amount of supervision/CPD events as set out within this policy to allow maintenance and development of competence. By signing the Approval to practice form for each NMP they are agreeing to this.
- Where at all possible you must support your NMPs to develop a job plan (Appendix 13 – example job plan template) for the role and your service – in teams where this is not a straight forward process i.e. Crisis Teams as a minimum a partial plan should be developed to ensure that supervision and CPD requirements are agreed and timetabled.
- Notify the Trust NMP Lead and Chief Pharmacist of any NMPs who leave the service or cease prescribing as soon as possible in writing, ensuring prescription pads for these staff have been returned to the Trust pharmacy team for safe destruction
- Notify the Trust NMP Lead if any NMPs are absent from work for over three months within a twelve month period to ensure on return to work, when appropriate, structures are put into place to ensure the NMPs are fit for practice to prescribe
- Provide appropriate storage facilities for the safety of prescription pads to ensure only the NMPs can access their allocated prescription pad
 - Support NMPs in their clinical practice, ensuring they are able to access adequate clinical supervision with their DPP a minimum of 6 hours per year (unless NMP is newly qualified then hourly monthly supervision for the first 6 months as a minimum). These sessions should in particular provide support and advice in any errors or clinical incidents.
- Ensure that NMPs take appropriate action in the case of lost or stolen prescription pads; support, advice and counsel staff as necessary
- Through appraisal, ensure that all NMPs are updated and working to current practice and that registration to practice is renewed and valid

- Raise any concerns related to the NMPs practice with the Trust NMP Lead to ensure structures may be put into place to overcome relevant issues. The Trust NMP Lead will liaise with the relevant professional lead and if appropriate can recall the Approval to Practice until such a time that the issues are resolved

4.1 NMP Register

An electronic register will be held by the Trust NMP Lead including all non-medical professionals who are involved in NMP practice, this register will identify individual's scope of practice and approval to do so, alongside original signatures.

The register will be accessible by the Chief Pharmacist and the pharmacy administration team to enable issuing of prescription pads.

The electronic register will contain **all** information relevant to individual NMPs including name, registration/PIN number, qualification and specialty, date of qualification, base and contact details, approval to practice form, approved scope of practice, and revalidation of prescribing.

It is the responsibility of the individual NMP and their manager to inform the Trust NMP Lead of any changes in circumstances immediately to ensure the Register is at all times up to date. This includes change of name, registration number, base or contact details or parameters of scope of prescribing

4.2 Concerns related to practice

If there are any concerns related to NMP practices these should be reported to the Trust NMP Lead. These concerns may include prescribing practices, lack of adherence to policy parameters, lack of adherence to CPD requirements, level of absence from work over a given period of time which could have a negative effect on their prescribing practice.

It is the NMPs responsibility to advise the Trust NMP lead of any absences from work which may impact on their ability to prescribe. These situations will be looked at on an individual basis and plans will be agreed between the NMP, line manager, DPP, Practice Assessor where applicable and Trust NMP lead to assist the NMP back into practice.

The Trust NMP Lead will discuss with the relevant NMPs manager and if appropriate Professional Lead. The Trust NMP Lead can request to withhold or remove approval to practice if there are sufficient concerns via the appropriate Clinical Director. If an individual has their approval to practice removed an action plan should be developed if the intention is to reapply for approval at a future date.

Prescribers must take responsibility for notifying the Trust NMP Lead of any absences from work for over three months within a twelve month period; any concerns around prescribing issues and/or problems adhering to governance framework as set out within this policy

The trust will hold vicarious liability for all NMPs where the following criteria are met:

- All NMPs are registered with their professional bodies with an annotation signifying the individual as a prescriber.
- The role of all NMPs is approved by the line manager and included within the individual's job description (appendix 2).
- The NMPs are included in the NMP register held by the NMP Lead.
- The NMPs work within the legal framework of the role.
- The individual must also ensure they have adequate professional indemnity insurance in accordance with advice from their professional registration body and staff side representatives; most healthcare union subscriptions include access to indemnity insurance.
- All NMPs must be aware of their professional accountability and responsibility when dealing/negotiating with companies and their representatives. Please refer to the Trust Medicines Code and Code of Practice for the Trust and the Pharmaceutical Industry document.

4.4 Driver, Vehicle & Licensing Agency (DVLA)

NMPs have a responsibility to ensure they are aware of the legal requirements around prescribing for a person who may drive whilst taking medicine, and the advice and guidance they have to give around the effects of the medicine. For further information all NMPs should access the following website:

http://www.dft.gov.uk:80/dvla/medical/medical_professionals.aspx

6 Starting practice as an NMP

6.1 Professional registration

Once training has been completed, NMPs **must** record their qualification with their professional body within one year. As part of the process of applying to practice within the Trust the NMP Lead will provide evidence of this registration to the appropriate final sign off person: Director of Nursing (for Nurse Prescribers)

Chief Pharmacist (for Pharmacist Prescribers)

Director of Therapies or Professional Head of the individual.

6.2 Trust Registration

6.2.1 Approval to Practice

- Before starting any prescribing practice, a Trust Approval to Practice and Scope of Practice forms must be completed to evidence specific service settings, prescribing qualifications attained and level of proposed prescribing practice in addition to approval from the relevant Service Manager, DPP and Professional Lead (appendix 1).
- Staff joining the Trust who are already qualified and professionally registered as NMPs, and NMPs planning to extend their prescribing practice into a new speciality, must evidence appropriate development in practice relevant to the clinical setting as agreed by the DPP with whom they will be working. A new or revised Approval to Practice form must be submitted and authorised prior to any subsequent prescribing.
- All NMPs must have a clause in their job description which includes a clear statement that prescribing is required as part of the duties of that post or service, (see appendix 2).
- Once authorised to practice if appropriate NMPs may apply for a prescription pad appropriate to their area of practice, e.g. FP10. See appendix 3, flowchart for access to prescription pads for guidance.

6.2.2 Scope of Practice

| When | What |
|--|---|
| Qualified and registered with the Trust | NMPs may assess, diagnose and prescribe for patients within their area of expertise NMPs can only prescribe at the level agreed on the Approval to Practice form unless approved and authorised via the submission of a new form. |
| Approval to prescribe independently | Automatically approves NMPs to prescribe in a supplementary capacity |
| Extending approval from supplementary to independent | NMP completes a further Approval to Practice (and scope of prescribing as required) form (appendix 1) and submits for relevant authorisation |
| Moving from novice to competent prescriber | The NMP submits a new Approval to Practice (and scope of prescribing as required) form which needs to be authorised |

| | |
|---|---|
| (Level 1 to Level 2) | |
| Moving from level 2 to 3. (competent to expert) | Following approval to progress to level 3 via the lead NMPs with final sign off at the Drugs and Therapeutics committee the NMP should submit a new Approval to Practice form which needs to be authorised. |

NMPs may prescribe a medicine for use outside the terms of its licence (off label) providing they are satisfied that there is a sufficient evidence base and/or experience of using the medicine to demonstrate its safety, efficacy and benefit to the patient (NMC, 2007, HPCP, 2016). All use of unlicensed and off label medications **must** be in accordance with the trust Drug & Therapeutic Committee's approved off licence use

[Guidelines for Unlicensed and Off-Label Use of Medicines](#)

7 Supervision/CPD/Ongoing Learning

The first few years of prescribing practice is a critical time with the emphasis on putting theory into practice taking into account all the legal requirements, clinical expectations and trust parameters. As such NMPs are required to work within a very structured regime of supervision and support at the onset of practice. Utilising the Benner framework for clinical development, novice to expert (1984), NMPs will be assessed and authorised at one of three levels of competence. The length of time an individual has been qualified and authorised to practice will not necessarily have an effect on the progress through this framework but evidence of competence and development in practice will. It is acknowledged that it is not necessary for all NMPs to progress to the expert (Level 3) to fully function within the role of prescriber but the level will have an effect on the amount of autonomy with which the NMPs can practice.

As an NMP you have access to the Medical Development In-House Teaching Programme. This is intended to support your professional development and will continue to evolve in both content and scope. It is divided into three components:

- In-House Trainer Support Programme
- In House Clinical Skills Development Programme
- In-House Additional Skills Development Programme

The programme will be sent out annually and the weekly timetables bi-annually via the lead nurse. All NMPs are encouraged to attend all relevant sessions.

CYPS, MHSOP, Physical Health Care Nurses and Pharmacy each have a supervision/support group to allow sharing of information and expertise within their specific area of practice. These groups should work within identified terms of reference and allow both the sharing and updating of relevant information related to prescribing and open discussions of clinical issues. Each group will identify a chair that will be responsible for the agenda and co-ordinate regular meetings.

Where a decision is made not to run supervision groups within a speciality then alternative arrangements should be made by NMPs to make sure that they access sufficient CPD and supervision to replace this. The Leads for the speciality will continue to disseminate information to members of that speciality and can offer supervision, advice or support on an

ad hoc basis if required by people for specific issues. NMPs can set up local peer supervision groups to replace the speciality supervision, but should ensure that they have some terms of reference (Appendix 14 example terms of reference) and record minutes and attendance at such groups. As the meetings vary in length and frequency for different specialities NMPs need to ensure that they achieve the equivalent of 50% attendance at the meetings, i.e. if there are 6x2 hour meetings normally, then you should be able to evidence 6 hours of CPD and supervision to replace this, in addition to the basic supervision requirements of the role.

Where there is a speciality supervision forum NMPs are recommended to attend sessions for a minimum of fifty per cent. Attendance will be monitored and lack of attendance as with all NMPs who don't reach the required CPD hours may negatively affect their authorisation to practice.

Through having 20 hours protected time all NMPs are expected to evidence both 6 hours of Supervision with their DPP with any additional Practice assessor sessions and 14 hours of CPD/Ongoing learning per year. This can include attendance at speciality supervisions. Any problems arising with NMPs accessing this should be directed to the Trust NMP lead.

CPD is the systematic maintenance, improvement and broadening of knowledge and skills and the development of personal qualities necessary for the execution of professional and technical duties throughout the practitioner's working life.

- All NMPs have a professional responsibility to keep themselves updated on clinical and professional developments through regular CPD and supervision.
- NMPs should use the attached CPD workbook (appendix 4) based, on the National Prescribing Centre competency framework, to evidence progress in expertise from Level 1 to Level 2. Newly qualified NMPs who have an up to date portfolio of prescribing evidence in agreement with the DPP can highlight the transferrable standards which should be cross referenced on the workbook. Those NMPs returning to practice or those changing speciality should complete the full workbook.
- NMPs authorised and practising at Level 2 and above may use the subject content within the CPD workbook as an aide memoir (appendix 5), to guide and inform their CPD related to prescribing
- NMPs will adhere to their professional requirements related to their NMP role
- NMPs are required to maintain a portfolio of their continuing professional development as prescribers. It is their responsibility to keep up to date in their field of practice and any changes in national and local policy.
- NMPs should keep a log of CPD and supervision at the front of their portfolio making reference to contents with appropriate signatures where relevant (appendix 6)
- All NMPs should ensure that they have regular clinical supervision, with a DPP and if appropriate practice assessor. Specific training/development requirements for individuals should be discussed at annual appraisal and included in the individuals Personal Development Plan.
- NMPs must be supported by their managers to attend relevant updates related to their prescribing practice
- NMPs and their DPP or Lead NMP for their speciality should always consider the use of Technology where face to face meetings/sessions/CPD cannot be facilitated i.e. Skype, WebEx etc.

8 Levels of practice

The trust needs to be able to assure competence of prescribers as part of the governance framework. As such newly qualified prescribers should work within the ethos of the trust's preceptorship policy. The process of preceptorship is about enhancing and maximising newly acquired skills for the benefit of the patient, the service and the individual. It is a period of support and guidance to facilitate the transition from novice to expert; the CPD workbook (appendix 4) should assist in this process. The NMPs may identify a mentor as a point of contact for advice and guidance, over and above the supervisory support received from the DPP and Practice assessor. The mentor may be, but does not have to be, a DPP.

Overview of requirements for Levels

| | Level 1 | Level 2 | Level 3 |
|----------------------|--|--|---|
| Supervision | 1 hour per month for the first 6 months, then minimum 6 hours per year | Minimum 6 hours per year | Minimum 6 hours per year |
| Approval to practice | Every 3 years or if any information changes | Every 3 years or if any information changes | Every 3 years or if any information changes |
| Scope of practice | Yes | Yes | No |
| Controlled drugs | Schedule 4 and 5 automatically; Schedule 2 and 3 following approval by DPP and dependent on role | Schedule 4 and 5 automatically; Schedule 2 and 3 following approval by DPP and dependent on role | All schedule of CD as long as appropriate to their role |
| CPD | 14 hours per year | 14 hours per year | 14 hours per year |
| Annual declaration | Yes | Yes | Yes |

8.1 Practising at Level 1 (novice)

It is expected that for the first six to twelve months of qualifying, depending on progression, practising NMPs will meet with their DPP at least once per month for a minimum of one hour supervision. These supervision meetings can be in the form of 1:1, group sessions or before/during/after clinics/meetings with patients. It is recommended that these sessions are at least an hour long though it is acknowledged that this is not always possible therefore sessions may be split into no shorter than 30 minutes, still ensuring a total of 1 hour each month. Any arrangements to do this must be documented within supervision records and should support the practitioner's development. Both parties will be expected to keep records of the meetings to evidence progress, including completion of the attached competency framework (appendix 4) to evidence competence which should be kept within their personal portfolio related to prescribing.

It is expected that the decision to move from novice to competent prescriber will be a joint one between NMP and the DPP with a new ATP form (and scope of prescribing as required) being submitted.

Prescribing CDs Level 1 – Schedule 4 and 5 automatically; Schedule 2 and 3 following approval by DPP and dependent on role.

8.2 Practising at Level 2 (competent)

Once the 'novice' stage of the prescribing role for NMPs has been complete, NMPs and their DPP can renegotiate the frequency of the supervision meetings and review and formulate a new supervision contract. The supervision meetings may be reduced but should be no less than every six weeks. The subject headings within the CPD framework may be used as an aide memoir (appendix 5) to ensure all aspects of prescribing competence are considered throughout the supervisory relationship. For the majority of NMPs this will be the most appropriate level of practice within their clinical role and setting. The expectation is that NMPs will continue to meet with the DPP, though less intensively, but will move towards more autonomous decision making and prescribing practices.

Level 2 NMPs may (appropriate to their role) amend lithium and clozapine doses providing there is evidence that the Consultant Psychiatrist is aware of the changes. Level 2 NMPs are not permitted to initiate lithium or Clozapine at any stage of treatment. This is not a blanket policy for all level 2 prescribers but requires agreed with respective DPP and requires to be noted separately on the scope of practice on their Approval to Practice.

Level 2 NMPs are required to have a minimum of 6 hours supervision with their DPP per year.

Practising at Level 3 (expert Prescribing CDs Level 2 – Schedule 4 and 5 automatically; Schedule 2 and 3 following approval by DPP and dependent on role

8.3 Practising at Level 3 (Expert)

If appropriate Level 2 NMPs may be signed off as an expert (level 3) in their field of prescribing. It is essential that those individuals wishing to progress to level 3 can demonstrate the following:

- Expert Knowledge on the drugs they are prescribing within their speciality, including modes of action, combination strategies and augmentations of commonly used medications.
- Proven leadership skills.
- Teaching and Presentation skills.
- Supervision skills.
- Willingness to deputise in the absence of the lead NMP i.e. attendance at D&T, lead NMP meetings etc.
- Extensive experience working with a complex caseload, working within the limits and beyond NICE guidance, using research evidence to treat patients who show resistance to normal treatment modes or who present with symptoms that are not commonly associated with their disorders.
- Be prepared to undertake additional responsibilities as identified, for example development of pathways, assistance with complaints or SI's.

Any level 3 application will consist of a completed form from the NMP (Appendix 13) and a letter from the DPP outlining the rationale and evidence supporting the application. All level 3 applications will be submitted to the Lead NMP Group via the Trust NMP Lead Nurse for discussion and review before being progressed for final sign off at the Drugs and Therapeutics committee.

The level 3 NMP is not required to complete or submit a scope of practice as they are expected to be responsible for ensuring their own scope of practice and will be able to justify their prescribing decisions. The approval to practice form will still be required to be completed. They are able to prescribe all schedule of CD as long as appropriate to their role.

Level 3 NMPs can be a DPP for both level 1 and 2 NMPs in replacement of a medical supervisor. .

Level 3 NMPs are required to have a minimum of 6 hours supervision with their DPP per year.

Level 3 non-medical prescribers may initiate HDAT in line with the Trust NMP Policy, and only following communication with a consultant (an ST4 doctor or above if out of hours) which must be recorded in the electronic patient record.

Within the 3 levels ALL NMPs should be able to demonstrate appropriate clinical monitoring and reviewing of prescribing decisions as per competency workbook.

9 Controlled drugs (CDs)

In 2012 The Misuse of Drugs regulations were amended to allow specific professions practising as NMPs to independently prescribe any controlled drugs within their approval to practise.

Approval to prescribe CDs should be assessed on an individual basis based on the flowchart in appendix 9

Any prescribing of CDs should be identified individually on the Approval to Practice stating whether each category or Schedule is to be within a supplementary arrangement or independently.

The approval to prescribe CDs should be clinically viable and for the patients' benefit

10 Clinical management plans

When working within a supplementary prescribing relationship the clinical management plan (Appendix 10) is the foundation stone of the prescribing partnership. The independent prescriber (doctor) must ensure that the supplementary prescriber has the necessary skills, knowledge and experience to prescribe in the defined clinical area and in accordance with the clinical management plan.

11 Record Keeping

Accurate and detailed records must be maintained of all prescribing decisions.

✓ [Records Management Policy](#)

✓ [Medicines – Prescribing and Initiation of Treatment](#)

Recording of prescribing medications must include: date of prescription, name of prescriber, name, dose and frequency of medicine. It is good practice to record reasons for prescription or any changes in treatment with a brief summary of the information given to patients regarding their medication.

Where appropriate NMPs will ensure they inform the patient's GP of any changes in medication in writing within five working days

12 Professional responsibility and accountability

All NMPs will:

- Be responsible for the initial registration of their extended practice qualification and the maintenance of that registration with their professional body.
- Work according to the procedures and processes related to NMPs and within nationally agreed standards for NMP, following the professional standards and guidelines for practice (e.g. NMC, GPhC, HCPC).
- Comply with all prescribing advice and guidance given within the Medicines Overarching Framework and related documents
- Fully assess the patient's need for treatment. Only products that are clinically appropriate and cost effective should be prescribed, in accordance with the assessment
- Only prescribe to patients, within the scope of the competency framework

13 Annual Declaration

All NMPs should have a current and valid Disclosure and Barring Service (DBS) as per Trust policy.

Following on from registering to practice, all NMPs will be inputted onto ESR to enable each practitioner to complete their annual declaration. The declaration is a mandatory process in which all NMPs are required to confirm their current details including supervision and CPD compliance. Any NMPs who do not complete this process within 1 month of becoming uncompliant/red with their matrix may have their prescribing rights suspended until completed. All NMPs will be expected to produce evidence of their CPD and supervision when requested for assurance purposes. For RN's this will be done at the point of revalidation. It is your responsibility to do so and if you fail to a request for this information will be sent. For pharmacists it is your responsibility to submit your evidence in line with your revalidation date on the 3rd year of revalidating.

Line managers will ensure that the NMP role is discussed and reflected in the annual appraisal process.

14 Prescription pads, prescribing and dispensing

- ✓ [Medicines – Prescribing and Initiation of Treatment](#)

15 Separation of prescribing, dispensing and administering of medicines

To reduce the potential for errors and/or omissions NMPs must, wherever possible, neither dispense nor administer medication they have prescribed. However, in rare circumstances it may be necessary to both prescribe and administer. When this occurs the prescriber should contact a fellow prescriber to discuss the situation, reasons behind it and both should document accordingly into the relevant patient notes. Where necessary the fellow prescriber may document retrospectively

16 Writing prescriptions on behalf of another (transcribing)

NMPs cannot write prescriptions on behalf of another unless they are competent to prescribe the medication, have full understanding of the pharmacology involved, and have the medication included within their authorised scope of practice and have completed a comprehensive assessment of the situation prior to issuing a prescription.

17 Patient Information

The patient must be offered the Trust approved patient information leaflet from the [choice and medication website](#)

18 How this policy will be implemented

- | |
|---|
| <ul style="list-style-type: none">• This policy will be published on the Trust's intranet and external website. |
| <ul style="list-style-type: none">• Line managers will disseminate this policy to all Trust employees through a line management briefing. |
| <ul style="list-style-type: none">• Lead Nurse for Medicine Management will disseminate directly to all NMPs |

18.1 Training needs analysis

No training needs identified, each NMP has a professional responsibility and accountability to keep up to date with this policy and their role.

19 How the implementation of this policy will be monitored

| Auditable Standard/Key Performance Indicators | | Frequency/Method/Person Responsible | Where results and any Associate Action Plan will be reported to, implemented and monitored; (this will usually be via the relevant Governance Group). |
|---|-----------|-------------------------------------|---|
| 1 | NMP audit | Annual/Audit/Linda Johnstone | Pharmacy sub audit group and QUAGS |

| Independent prescribing | <ul style="list-style-type: none"> Independent prescribing is prescribing by a practitioner who is responsible and accountable for the assessment of patients with undiagnosed and diagnosed conditions, and for decisions about the clinical management required, including prescribing. These practitioners are not restricted by a separate formulary but can prescribe any licensed medication for any condition. The limit for any prescribing is the scope of the prescriber's professional practice as defined by their professional registering body; the registered prescriber may only prescribe within their own level of experience, knowledge and competence; within the scope of their professional role. |
| Designated Prescribing Practitioner (DPP) | <ul style="list-style-type: none"> Throughout this document the term Designated Prescribing Practitioner (DPP) will be used when referring to both the designated prescriber required throughout the NMPs training and the supervisor required following the NMPs registration with both the professional body and the trust. These roles can, but do not have to be, fulfilled by the same person. |

Appendix 2 – Job descriptions

The role of the NMP must be included in the individual's job description with a clear statement that prescribing is required as part of the duties of either the post or the service.

Requirement of the post: If an individual post requires the individual to be a non-medical prescriber the job description should be implicit, within the job specification the qualifications should be essential.

Requirement of the service: If a proportion of roles within a service require a non-medical prescriber, the role in the job specification may be within desirable.

The inclusions under should be within the job description of each non-medical prescriber within the trust. For personnel new to the trust this should be within the main body of the job description, for those currently in trust employ they may be added as an addendum, signed, dated and placed on personal files as evidence of trust support of the role.

INCLUSIONS:

Minimum qualification:

- Recorded on the appropriate professional register as an independent/supplementary prescriber.

Job Summary:

- To work in partnership with client and independent medical prescriber to fulfil the role of non-medical prescriber
- To promote patient wellbeing via timely access to prescribed medication

Clinical responsibilities:

- To work collaboratively with the independent medical prescriber, patient and carers to produce patient centred clinical management plans for supplementary prescribing.
- As an independent non-medical prescriber to work collaboratively with independent medical prescriber, patient and carers to communicate prescribing decisions, clinical rationales and treatment plans.
- To receive mandatory supervision from the independent medical prescriber specific to the non-medical prescribing role.
- To maintain and develops clinical and pharmaceutical knowledge relevant to area of practice.
- To review, diagnose and generate treatment options within the role of non-medical prescriber.
- To establish relationships based on trust and mutual respect, working with client/carers as partners in the consultation process.

Administrative responsibilities:

- To produce non-medical prescribing plans that are timely, relevant, accurate, evaluated, dated, signed, legible and objective and communicate these to other relevant agencies.

Professional and educational responsibilities:

- To positively promote the role of the non-medical prescriber to other agencies/ disciplines.
- To maintain and update non-medical prescribing skills
- To be able to access, critically appraise and apply relevant information/knowledge into clinical practice.
- To adhere to trust policies and procedures and work within professional and organisational standards.
- To attend trust non-medical prescribing events a minimum of two times per annum
- To maintain a professional portfolio and keep up to date with developments in non-medical prescribing practice and maintain registration in line with professional educational requirements.
- To work within own prescribing competencies and limitations.

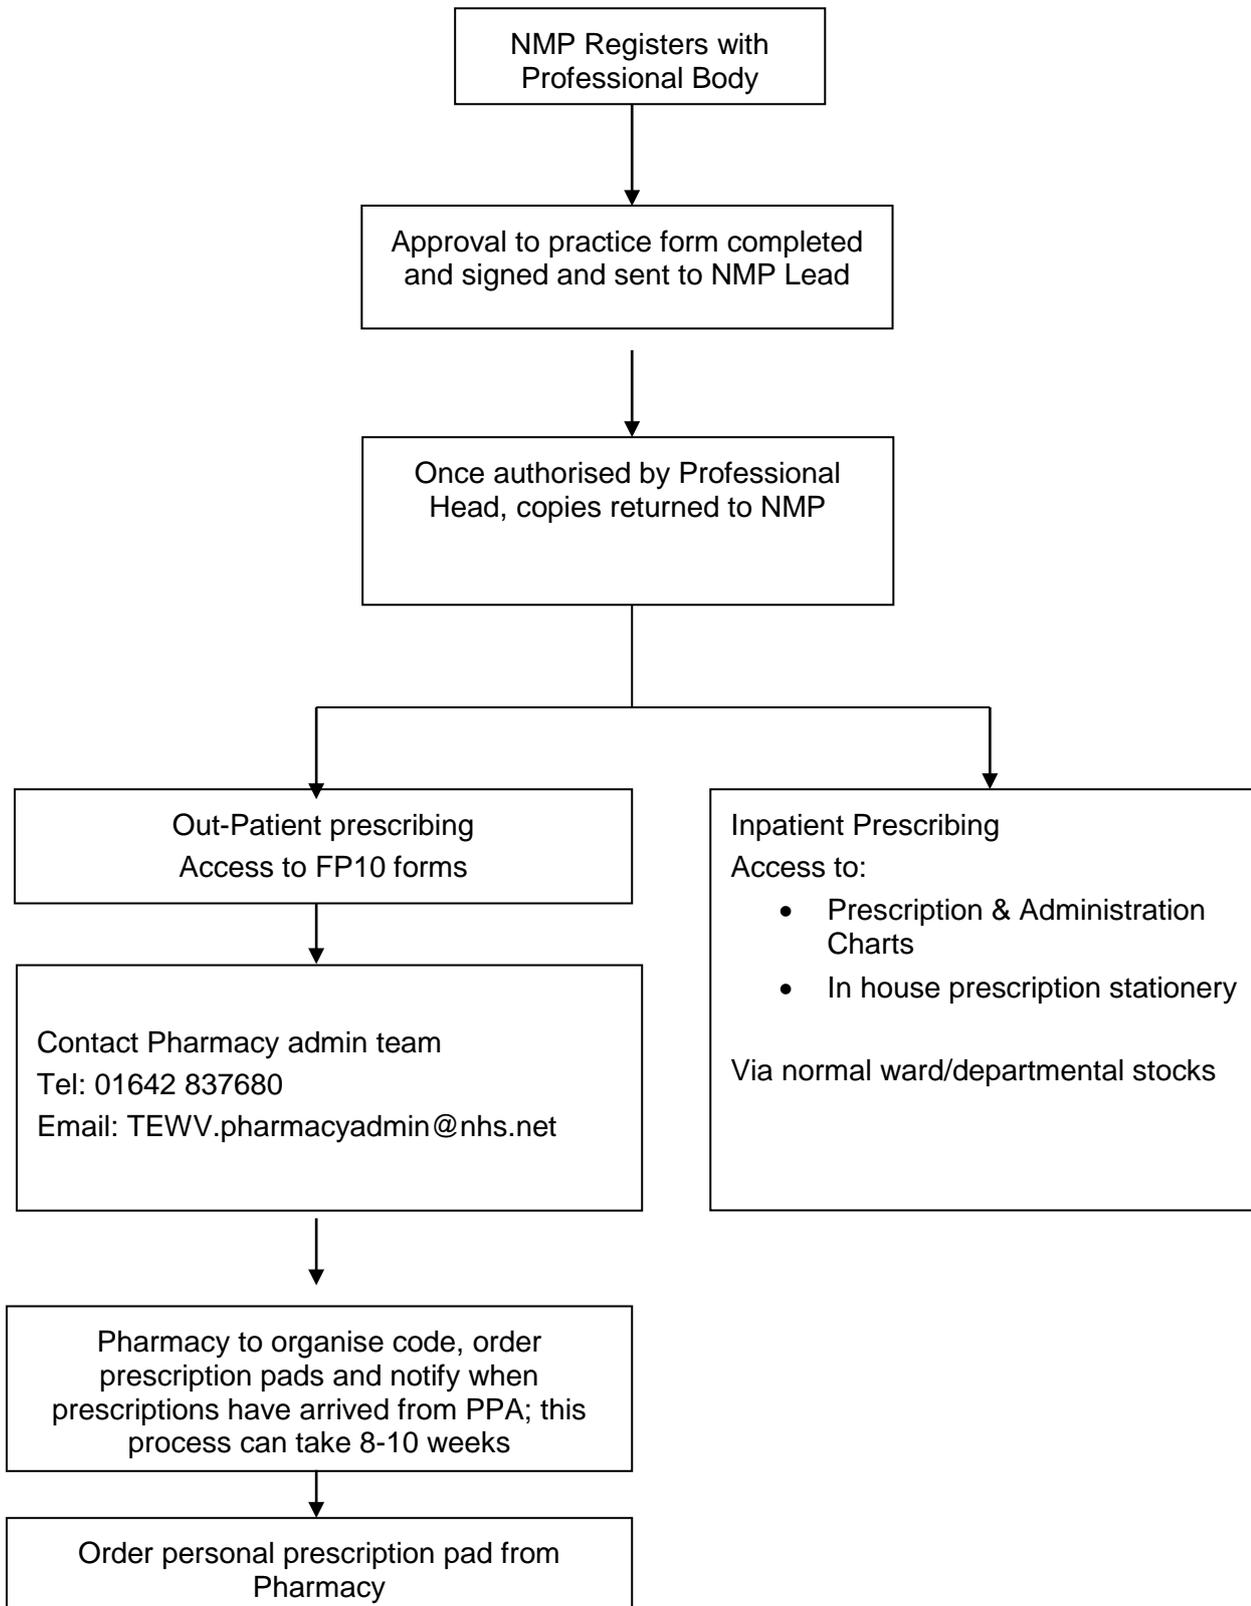

Managerial responsibilities:

- Demonstrate decision making and problem solving skills as a non-medical prescriber.
- To be responsible for the safety and security of the FP10 and prescription pads in accordance with trust policies and procedures.

Quality assurance:

- To participate in the review and development of prescribing practice in order to improve care and professional standards.
- To be involved in producing, evaluating and auditing policies, procedures and standards relating to the role of the non-medical prescriber within the Trust.

THE CONSULTATION

1. CLINICAL AND PHARMACEUTICAL KNOWLEDGE - Has up-to-date clinical and pharmaceutical knowledge relevant to own area of practice

| Indicator | Evidence and Comments | Signatures & Dates | |
|--|-----------------------|--------------------|------------|
| | | NMP | Supervisor |
| Understands the conditions being treated, their natural progress and how to assess their severity | | | |
| Understands different non-pharmacological and pharmacological approaches to modifying conditions and promoting health, desirable and undesirable outcomes, and how to identify and assess them | | | |
| Understands the mode of action and pharmacokinetics of medicines, how these mechanisms may be altered (e.g. by age, renal impairment) and how this affects dosage | | | |
| Understands the potential for unwanted effects (e.g. allergy, ADRs, drug interactions, special precautions and contraindications) and how to avoid/minimise, recognise and manage them | | | |

| Maintains an up-to-date knowledge of products in the BNF / drug tariff (e.g. doses, formulations, pack sizes, storage conditions, costs) | | | |
|---|-----------------------|--------------------|------------|
| Understands how medicines are licensed, monitored (e.g. ADR reporting) and supplied | | | |
| Applies the principles of evidence-based medicine, clinical and cost-effectiveness | | | |
| Understands the public health issues related to medicines use | | | |
| Appreciates the misuse potential of medicines | | | |
| 2. ESTABLISHING OPTIONS - Reviews diagnosis, generates treatment options for the patient and follows up treatment within the scope of the clinical management plan | | | |
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Takes and/or reviews the medical and medication history and undertakes a physical examination where appropriate | | | |
| Views and assesses the patient's needs holistically (psychosocial, physical) | | | |

| | | | |
|---|--|--|--|
| | | | |
| Accesses and interprets all relevant patient records to ensure knowledge of the patient's management | | | |
| Reviews the nature, severity and significance of the diagnosis/clinical problem | | | |
| Requests and interprets relevant diagnostic tests | | | |
| Considers no treatment, non-drug and drug treatment options (including referral and preventative measures) | | | |
| Assesses the effect of multiple pathologies, existing medication and contraindications to treatment options | | | |
| Assesses the risks and benefits to the patient of taking/not taking a medicine (or using/not using a treatment) | | | |
| Selects the most appropriate medicine, dose and formulation for the individual patient; prescribes appropriate quantities | | | |
| Monitors effectiveness of treatment and potential side-effects | | | |

| Establishes, monitors and makes changes in light of the therapeutic objective and treatment outcome | | | |
|---|-----------------------|--------------------|------------|
| Ensures that patients can access ongoing supplies of their medication | | | |
| 3. COMMUNICATING WITH PATIENTS - Establishes a relationship based on trust and mutual respect, sees patients as partners in the consultation and applies the principles of concordance | | | |
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Ensures that the patient understands and consents to be managed by a prescribing partnership in accordance with local arrangements | | | |
| Listens to and understands patients beliefs and expectations | | | |
| Understands the cultural, language and religious implications of prescribing | | | |
| Adapts consultation style to meet the needs of different patients (e.g. for age, level of understanding, physical impairments) | | | |

| | | | |
|--|--|--|--|
| Deals sensitively with patients' emotions and concerns | | | |
| Creates a relationship which does not encourage the expectation that a prescription will be written | | | |
| Explains the nature of the patient's condition and the rationale behind, and potential risks and benefits of, management options | | | |
| Enables patients to make informed choices about their management | | | |
| Negotiates an outcome to the consultation that both patient and prescriber are satisfied with | | | |
| Encourages patients to take responsibility for their own health and self-manage their conditions | | | |
| Gives clear instructions to the patient about their medication (e.g. how to take/administer it, where to get it from, possible side-effects) | | | |
| Checks the patients understanding of, and commitment to, their treatment | | | |

| PRESCRIBING EFFECTIVELY | | | |
|---|-----------------------|--------------------|------------|
| 1. PRESCRIBING SAFELY - Is aware of own limitations, does not compromise patient safety and justifies prescribing decisions | | | |
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Knows the limits of own knowledge and skill, works within them | | | |
| Knows how and when to refer back to, or seek guidance from, the independent medical prescriber, another member of the team or a specialist | | | |
| Only prescribes a medicine with adequate, up-to-date knowledge of its actions, indications, contra-indications, interactions, cautions, dose and side-effects | | | |
| Knows about common types of medication errors and how to prevent them | | | |
| Makes prescribing decisions often enough to maintain confidence and competence | | | |
| Keeps up-to-date with advances in practice and emerging safety concerns relating to prescribing | | | |
| Understands the need for, and makes, accurate and timely records and clinical notes | | | |

| Writes legible, clear and complete prescriptions which meet legal requirements | | | |
|--|-----------------------|--------------------|------------|
| Checks doses and calculations to ensure accuracy and safety | | | |
| 2. PRESCRIBING PROFESSIONALLY - Works within professional, regulatory and organisational standards | | | |
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Accepts personal responsibility for own prescribing and understands the legal and ethical implications of doing so | | | |
| Uses professional judgement to make prescribing decisions based on the needs of patients and not the prescribers personal considerations | | | |
| Understands how current legislation affects prescribing practice | | | |
| Prescribes within current professional and organisational codes of practice/standards | | | |
| Keeps prescription pads safely and knows what to do if they are stolen/lost | | | |

| 3. IMPROVING PRESCRIBING PRACTICE - Actively participates in the review and development of prescribing practice to improve patient care | | | |
|--|-----------------------|--------------------|------------|
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Reflects on own performance, can learn and change prescribing practice | | | |
| Shares and debates own, and others', prescribing practice (e.g. audit, peer group review) | | | |
| Challenges colleagues' inappropriate practice constructively | | | |
| Understands and uses tools to improve prescribing (e.g. review of PACT/prescribing data/feedback from patients) | | | |
| Reports prescribing errors and near misses, reviews practice to prevent recurrence | | | |
| Develops own networks for support, reflection and learning | | | |
| Establishes multi-professional links with | | | |

| practitioners working in the same specialist area | | | |
|---|-----------------------|--------------------|------------|
| Takes responsibility for own continuing professional development | | | |
| <u>PRESCRIBING IN CONTEXT</u> | | | |
| 1. INFORMATION IN CONTEXT - Knows how to access relevant information and can critically appraise and apply information in practice | | | |
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Understands the advantages and limitations of different information sources | | | |
| Uses relevant, up-to-date information, both written (paper/electronic) and verbal | | | |
| Critically appraises the validity of information (e.g. promotional literature, research reports) when necessary | | | |
| Applies information to the clinical context (linking theory to practice) | | | |
| Uses relevant patient record systems, prescribing and information systems, and decision support tools | | | |

| Regularly reviews the evidence behind therapeutic strategies | | | |
|--|-----------------------|--------------------|------------|
| 2. THE NHS IN CONTEXT - Understands, and works with, local and national policies that impact on prescribing practice; can see how own practice impacts on wider NHS | | | |
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Understands the framework of non-medical prescribing and how it is applied in practice | | | |
| Understands and works with local NHS organisations and relevant agencies contributing to health improvement (e.g. social services) | | | |
| Works within local frameworks for medicines use as appropriate (e.g. PGDs, formularies, protocols and guidelines) | | | |
| Works within the NHS/organisational code of conduct when dealing with the pharmaceutical industry | | | |
| Understands drug budgetary constraints at local and national levels; can discuss them with colleagues and patients | | | |
| Understands national NHS frameworks for medicines use (e.g. NICE, NSFs, medicines management, clinical governance, IT strategy) | | | |

| 3. THE TEAM AND INDIVIDUAL CONTEXT - Works in partnership with colleagues for the benefit of patients. Is self-aware and confident in own ability as a prescriber | | | |
|--|-----------------------|--------------------|------------|
| Indicator | Evidence and Comments | Signatures & Dates | |
| | | NMP | Supervisor |
| Relates to the mentor/supervisory prescriber as an equal partner | | | |
| Negotiates with the independent medical prescriber to develop and agree clinical management plans where appropriate | | | |
| Thinks and acts as part of a multidisciplinary team to ensure that continuity of care is not compromised | | | |
| Establishes relationships with colleagues based on understanding, trust and respect for each other's roles | | | |
| Recognises and deals with pressures that may result in inappropriate prescribing | | | |
| Is adaptable, flexible, proactive and responsive to change | | | |
| Seeks and/or provides support and advice to other prescribers, team members and support staff where appropriate | | | |
| Negotiates the appropriate level of support for role as a prescriber | | | |

Appendix 6 - Non Medical Prescribers - Supervision contract

(Adapted from TEWV Supervision Policy)

This supervision contract should be used as a basis for individual discussion, agreement and negotiation. However, any negotiation must meet the requirements of trust Non-Medical Prescribing policy

.....

Confidentiality and Record Keeping:

Confidentiality between supervisor and supervisee cannot be absolute within supervision. Trust and respect are an important part of the supervisory relationship but it is important to recognise that this has boundaries. Information may need to be shared for a variety of reasons such as:

- A public safety issue being recognised in the supervisees work
- A breach of codes of conduct, policy or law
- Criminal activity being revealed by the supervisee
- Audit or evaluation of supervision

Supervision frequently covers aspects of work with service users and supervisory responsibilities. General and informed consent should be sought for those occasions where identifiable information may be discussed

Appendix 11 - Level 3 NMP Application form

Name:

Job Title:

Directorate:

Speciality:

Designated Prescribing Practitioner:

In the box below please give details of your experience and knowledge of prescribing within your speciality: (please include evidence of the following: experience working with a complex caseload, working within the limits and beyond NICE guidance, using research evidence to treat patients)

In the box below please give details of leadership skills:

In the box below please give details of any teaching or presentations that you have facilitated:

In the box below please give details of your experience in supervision of staff:

By submitting this application to become a level 3 NMP you are also demonstrating:

1. A Willingness to deputise in the absence of the lead NMP i.e. attendance at D&T, lead NMP meetings etc.
2. You are prepared to undertake additional responsibilities as identified, for example development of pathways, assistance with complaints or SI's.

Before submitting this application you must ensure that you have agreement from your medical /level 3 supervisor and will be able to provide or are in receipt of a letter from them outlining the rationale and evidence supporting the application.

Appendix 13 – Terms of Reference Template

| TERMS OF REFERENCE |
|--|
| Non-Medical Prescribing Supervision Group |
| CONSTITUTION |
| <ul style="list-style-type: none"> The Non-Medical Prescribing Supervision Group has been established to provide Non-Medical Independent and Supplementary Prescribers (and those in training) with the opportunity to discuss cases, learn from supervision and feedback any issues. |
| KEY OBJECTIVE |
| <ul style="list-style-type: none"> To provide a supervision forum for staff in the area where case discussion, exchange of ideas and information and advice can be accessed. |
| MEMBERSHIP |
| <ul style="list-style-type: none"> Non-medical prescribers Level 3 NMP (where the Level 3 NMP is not present trainees cannot count the meeting as a supervision session for their training). (delete if no Level 3 in group) Other relevant persons may be invited to attend to provide information on a particular agenda item. |
| Chair of Meetings |
| <ul style="list-style-type: none"> The Supervision Group will be chaired by |
| FREQUENCY OF MEETINGS |
| <ul style="list-style-type: none"> Every month |
| ADMINISTRATIVE ARRANGEMENTS |
| <ul style="list-style-type: none"> Notes of the supervision group will be taken and typed up after each meeting and any patient information anonymised in line with IG policy. All meeting notes and action plans will be circulated to the members of the group for evidence in their portfolios. |
| DUTIES AND OBJECTIVES |
| Attendance: |
| <ul style="list-style-type: none"> Each member is responsible for their attendance at the group. |
| Confidentiality: |
| <ul style="list-style-type: none"> The group will take every precaution to respect patient confidentiality. The group will respect the confidentiality of each group member and issues pertaining to a group member will not be discussed outside of the group. |
| Exceptions to maintaining confidentiality: |
| <ul style="list-style-type: none"> If issues are disclosed that are likely to affect the service or the trust these issues will be discussed with the line manager. If patient safety is likely to be compromised or has already been compromised these issues will be discussed with the line manager. |
| Safe place: |
| <ul style="list-style-type: none"> The group will endeavour to create a safe place where each member feels valued and is able to ask questions no matter how significant these questions may appear to be. |

Respect:

- Each person within the group will be given respect.
- Each person's opinion within the group will be respected.
- In order to promote respect for each group member only one person at a time will speak.

Sharing and learning:

- There are no experts in the group and the group will be a place of sharing and learning.
- The group will adopt a 'no blame' attitude and culture.

Communication:

- The group will endeavour to effectively communicate with each other.

Evaluation:

- The group will evaluate the effectiveness of the group supervision yearly.
